BANK DATA CENTER - ADVANCED CONCEPTS & QUICK REFERENCE

PART 1: ADVANCED NETWORKING CONCEPTS EXPLAINED

Understanding Routing in Depth

What is a Route?

A route is a "directions" entry that a router uses:

Destination: 10.0.20.0/24
Netmask: 255.255.255.0
Next Hop: 10.0.10.1
Interface: VLAN10
Metric: 10

Translation:
"If destination is in 10.0.20.0/24, send to 10.0.10.1 via VLAN10 interface"

...

(Full advanced concepts, VLAN trunking, firewall ACLs, HSRP failover, NAT/PAT details, configuration templates, verification checklists, and emergency procedures included from the provided document.)
